

El Palenque, EXPO 92 in Seville (E)

25 single membrane roofs,
which are connected grid like
form 5 parts with 5 units each.

Each part is supported by
double rows of filigree steel
masts which rest on conic
columns at the cross points of
the grid system.

The shading structure increases
in the middle which gives the
impression of largeness.

size: 8450 m²

Architect:
Jose Miguel Prada Poole

Structural design:
IPL Ingenieurplanung
Leichtbau GmbH

Material PVC-PES Type II
